

# Membrane Alka Cleaner ORG MC 511 Liq

Part No. RXSOL-33-3323-025 — Generated 10 Oct 2026

## 1. Product and Company Identification

Product Name RXSOL-33-3323-025  
Product Type Membrane Alka Cleaner ORG MC 511 Liq

Company Details: RXSOL-33-3323-025

RX MARINE INTERNATIONAL  
105, A wing , BSEL , TECH PARK.  
VASHI ,NEW BOMBAY 400703 INDIA

Stock Points: Mumbai, Kandla, Kolkata, Chennai, Visakhapatnam, Fujairah UAE, Muscat Oman, Kenya, Canada

Phone +91 22 65113333 / 5555 / 9999  
Fax +91 22 2781 1318 ::::AOH :0091 9821214367

## 2. Composition / informationon ingredients

| Cas#        | Chemical Name                                                              | Range(w/w%) |
|-------------|----------------------------------------------------------------------------|-------------|
| 7320-34-5   | Tetrapotassium Pyrophosphate                                               | 5 -10       |
| 1310-58-3   | Potassium Hydroxide                                                        | 5 - 10      |
| 5064-31-3   | NITRILOTRIACETIC ACID,TRISODIUM SALT (NTA.3NA)                             | 0.1-1.0     |
| 139-89-9    | N-HYDROXYETHYLENEDIAMINE TRIACETIC ACID TRISODIUM SALT                     | 15-40       |
| 102-71-6    | TRIETHANOLAMINE                                                            | 15-40       |
| 141-43-5    | MONOETHANOLAMINE (ETHANOLAMINE)                                            | 10-20       |
| 111-42-2    | DIETHANOLAMINE (ETHANOL,2,2'-IMINODI-)                                     | 3-7         |
| 119345-04-9 | BENZENE, 1,1'-OXYBIS-,TETRAPROPYLENE DERIVATIVES, SULFONATED, SODIUM SALTS | 1-5         |
| -           | Proprietary Blend of biodegradable surfactants and chelating agents        | >70         |

## 3. Hazards Identification

Severe irritant to the skin. Severe irritant to the eyes, possibly corrosive. Irritation of the upper respiratory tract. Prolonged exposure may cause dizziness and headache.

DOT hazard: ORS (when container > RQ)  
Odor: Slight; Appearance: Colorless To Amber, Liquid

Fire fighters should wear positive pressure self-contained breathing apparatus(full face-piece type). Proper fire-extinguishing media: dry chemical, carbon dioxide, foam or water

### POTENTIAL HEALTH EFFECTS

ACUTE SKIN EFFECTS: Primary route of exposure; Severe irritant to the skin.

ACUTE EYE EFFECTS: Severe irritant to the eyes, possibly corrosive.

#### ACUTE RESPIRATORY EFFECTS:

Primary route of exposure;Irritation of the upper respiratory tract. Prolonged exposure may cause dizziness and headache.

#### INGESTION EFFECTS:

May cause gastrointestinal irritation with possible nausea, vomiting, abdominal discomfort and diarrhea.

#### TARGET ORGANS:

Prolonged or repeated exposure may causes primary irritant dermatitis and/or toxicity to the liver, kidney, nervous system and blood. May increase the risk of cancer based on limited animal data.

#### MEDICAL CONDITIONS AGGRAVATED:

Pre-existing skin disorders and chronic respiratory disease.

#### SYMPTOMS OF EXPOSURE:

Causes irritation of the skin, eyes, and/or respiratory system.

## 4. First Aid Measures

|                                                                            |                                                                                                                                                                                                      |
|----------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| General advice                                                             | Show this material safety data sheet to the doctor in attendance.                                                                                                                                    |
| If inhaled                                                                 | Remove to fresh air. Treat symptomatically. Get medical attention if symptoms occur.                                                                                                                 |
| Eye Contact                                                                | Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention immediately. .    |
| Swallowed                                                                  | Rinse mouth with water. Do NOT induce vomiting. Never give anything by mouth to an unconscious person. Get medical attention immediately.                                                            |
| Skin Contact                                                               | Wash off immediately with plenty of water for at least 15 minutes. Use a mild soap if available. Wash clothing before reuse. Thoroughly clean shoes before reuse. Get medical attention immediately. |
| Inhalation                                                                 | Remove patient to fresh air, keep warm and at rest and get medical assistance in necessary.                                                                                                          |
| Protection of first-aiders                                                 | In event of emergency assess the danger before taking action. Do not put yourself at risk of injury. If in doubt, contact emergency responders.Use personal protective equipment as required.        |
| Most important symptoms and effects, both acute and delaye                 | See Section 11 for more detailed information on health effects and symptoms.                                                                                                                         |
| Indication of any immediate medical attention and special treatment needed | No data available                                                                                                                                                                                    |

## 5. Fire-fighting Measures

|                                                       |                                                                                                                                                                                                                               |
|-------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Flammability                                          | May be combustible at high temperature.                                                                                                                                                                                       |
| Flash Point                                           | Higher than 93.3°C (200°F).                                                                                                                                                                                                   |
| Suitable extinguishing media                          | Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.                                                                                                                       |
| Specific extinguishing methods                        | Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations. In the event of fire and/or explosion do not breathe fumes.                                                 |
| Special hazards arising from the substance or mixture | Carbon oxides Combustible. Vapors are heavier than air and may spread along floors. Forms explosive mixtures with air on intense heating. Development of hazardous combustion gases or vapours possible in the event of fire. |
| Further information                                   | Prevent fire extinguishing water from contaminating surface water or the ground water system.                                                                                                                                 |

|                                               |                                                                                                                                     |
|-----------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------|
| Hazardous combustion products                 | Decomposition products may include the following materials: Carbon oxides nitrogen oxides (NOx) Sulphur oxides Oxides of phosphorus |
| Specific hazards during firefighting          | Not flammable or combustible.                                                                                                       |
| Special protective equipment for firefighters | Use personal protective equipment.                                                                                                  |
| Specific Hazards Arising from the Chemical    | Has a fire-promoting effect due to the release of oxygen.<br>Ambient fire may liberate hazardous vapours.                           |

## 6. Accidental Release Measures

|                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                             |
|---------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Personal precautions, protective equipment and emergency procedures | Ensure adequate ventilation. Keep people away from and upwind of spill/leak. Avoid inhalation, ingestion and contact with skin and eyes. When workers are facing concentrations above the exposure limit they must use appropriate certified respirators. Ensure clean-up is conducted by trained personnel only. Refer to protective measures listed in sections 7 and 8.                                  |
| Spillage                                                            | Oxidizing material. Stop leak if without risk. Avoid contact with a combustible material (wood, paper, oil, clothing...). Keep substance damp using water spray. Do not touch spilled material. Prevent entry into sewers, basements or confined areas dike if needed. Eliminate all ignition sources. Call for assistance on disposal.                                                                     |
| Personal Protection                                                 | Advice for non-emergency personnel: Avoid inhalation of dusts. Evacuate the danger area, observe emergency procedures, consult an expert. Advice for emergency responders: Protective equipment see section 8.                                                                                                                                                                                              |
| Environmental Precaution                                            | Do not allow contact with soil, surface or ground water.                                                                                                                                                                                                                                                                                                                                                    |
| Methods and materials for containment and cleaning                  | Stop leak if safe to do so. Contain spillage, and then collect with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local / national regulations (see section 13). For large spills, dike spilled material or otherwise contain material to ensure runoff does not reach a waterway. Flush away traces with water. |

## 7. Handling and Storage

|                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|--------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Advice on safe handling                                      | Do not ingest. Do not breathe dust/fume/gas/mist/vapours/spray. Do not get in eyes, on skin, or on clothing. Wash hands thoroughly after handling. Use only with adequate ventilation.                                                                                                                                                                                                                                                                                 |
| Advice on protection against fire and explosion              | Keep away from open flames, hot surfaces and sources of ignition.                                                                                                                                                                                                                                                                                                                                                                                                      |
| Suitable material                                            | The following compatibility data is suggested based on similar product data and/or industry experience: HDPE (high density polyethylene), Stainless Steel 304, Compatibility with Plastic Materials can vary; we therefore recommend that compatibility is tested prior to use., Mild steel, Stainless Steel 316L, Polyurethane, Buna-N, EPDM, Polyethylene, Polypropylene, PVC, Epoxy phenolic resin, Neoprene, Chlorosulfonated polyethylene rubber, Fluoroelastomer |
| Unsuitable material                                          | The following compatibility data is suggested based on similar product data and/or industry experience: Brass, 100% phenolic resin liner                                                                                                                                                                                                                                                                                                                               |
| Hygiene measures                                             | Immediately change contaminated clothing. Apply preventive skin protection. Wash hands and face after working with substance. For precautions see section 2.2.                                                                                                                                                                                                                                                                                                         |
| Precautions for safe handling                                | For precautions see section 2.2.                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| Conditions for safe storage, including any incompatibilities | Store the container tightly closed in a dry, cool and well-ventilated place. Store apart from foodstuff containers or incompatible materials.                                                                                                                                                                                                                                                                                                                          |
| Storage conditions                                           | Do not store near acids. Keep out of reach of children. Keep container tightly closed. Store in suitable labeled containers.                                                                                                                                                                                                                                                                                                                                           |
| Storage class                                                | Storage class (TRGS 510): 13: Non Combustible Solids                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Specific end use(s)                                          | Apart from the uses mentioned in section 1.2 no other specific uses are stipulated                                                                                                                                                                                                                                                                                                                                                                                     |

Advice on general occupational hygiene      Advice on safe handling      Observe label precautions. Change contaminated clothing. Wash hands after working with substance.

## 8. Exposure controls and personal protection

Components with workplace control parameters

| Components                        | CAS-No.                                                                                                                                                                                                                                                                                                            | Form of exposure | Permissible concentration | Basis     |
|-----------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------|---------------------------|-----------|

## 10. Stability and reactivity

|                                    |                                                                                                                                                                                                                                                                                                                                  |
|------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity                         | Forms explosive mixtures with air on intense heating. A range from approx. 15 Kelvin below the flash point is to be rated as critical. The following applies in general to flammable organic substances and mixtures: in correspondingly fine distribution, when whirled up a dust explosion potential may generally be assumed. |
| Stability                          | Stable under normal conditions.                                                                                                                                                                                                                                                                                                  |
| Possibility of hazardous reactions | No dangerous reaction known under conditions of normal use.                                                                                                                                                                                                                                                                      |
| Conditions to avoid                | Freezing temperatures.                                                                                                                                                                                                                                                                                                           |
| Incompatible materials             | Contact with reactive metals (e.g. aluminum) may result in the generation of flammable hydrogen gas. Contact with strong oxidizers (e.g. chlorine, peroxides, chromates, nitric acid, perchlorate, concentrated oxygen, permanganate) may generate heat, fires, explosions and/or toxic vapors.                                  |
| Hazardous decomposition products   | Decomposition products may include the following materials: Carbon oxides nitrogen oxides (NO <sub>x</sub> ) Sulphur oxides Oxides of phosphorus                                                                                                                                                                                 |

## 11. Toxicological information

|                                          |                                                             |
|------------------------------------------|-------------------------------------------------------------|
| Acute oral toxicity                      | LD50 rat: > 2,000 mg/kg Test substance: Product             |
| Information on likely routes of exposure | Inhalation, Eye contact, Skin contact                       |
| Skin                                     | Causes severe skin burns.                                   |
| Eyes                                     | Causes serious eye damage.                                  |
| Ingestion                                | Causes digestive tract burns.                               |
| Inhalation                               | May cause nose, throat, and lung irritation.                |
| Chronic Exposure                         | Health injuries are not known or expected under normal use. |
| Carcinogenicity                          | No data available                                           |
| Germ cell mutagenicity                   | No data available                                           |
| Reproductive toxicity                    | No data available                                           |

| Special Remarks on other Toxi Effects on Humans  | Acute Potential Health Effects: Skin: Causes skin irritation. May cause skin sensitization, an allergic reaction, which becomes evident upon re-exposure to this material. Eyes: Causes eye irritation. Ingestion: Causes gastrointestinal (digestive) tract irritation with nausea, vomiting, and diarrhea. May be harmful if swallowed. Inhalation: Causes respiratory tract irritation. May cause chemical pneumonitis and pulmonary edema, inflammation, edema of bronchi and larynx. Chronic Potential Health Effects: Repeated or prolonged skin exposure may cause allergic reactions in sensitive individuals. Repeated or prolonged exposure by inhalation may affect respiration and metabolism. |
| Additional Information                           | RTECS: AF3675000 Gastrointestinal disturbance To the best of our knowledge, the chemical, physical, and toxicological properties have not been thoroughly investigated. After uptake of large quantities: muscular symptoms agitation Convulsions Headache Tremors Nausea psychoses                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Endocrine disrupting properties                  | The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher. Repeated dose toxicity - Rat - male - Oral - 2 yr - NOAEL (No observed adverse effect level) - 600 mg/kg RTECS: LS9625000 Gastrointestinal disturbance To the best of our knowledge, the chemical, physical, and toxicological properties have not been thoroughly investigated.                                                                                                                                                               |

## 12. Ecological information

| Products Biodegradation                             | The methods for determining the biological degradability are not applicable to inorganic substances.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Mobility                                            | The environmental fate was estimated using a level III fugacity model embedded in the EPI (estimation program interface) Suite TM, provided by the US EPA. The model assumes a steady state condition between the total input and output. The level III model does not require equilibrium between the defined media. The information provided is intended to give the user a general estimate of the environmental fate of this product under the defined conditions of the models. If released into the environment this material is expected to distribute to the air, water and soil/sediment in the approximate respective percentages; Air : 5% Water : 30 - 50% Soil : 50 - 70% The portion in water is expected to be soluble or dispersible. |
| Bioaccumulative potential                           | This preparation or material is not expected to bioaccumulate.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Results of PBT and vPvB assessment                  | This substance/mixture contains no components considered to be either persistent, bioaccumulative and toxic (PBT), or very persistent and very bioaccumulative (vPvB) at levels of 0.1% or higher.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Other adverse effects                               | No data available                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

## 13. Disposal considerations

|                         |                                                                                                                                                                                                                |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Disposal methods        | Where possible recycling is preferred to disposal or incineration. If recycling is not practicable, dispose of in compliance with local regulations. Dispose of wastes in an approved waste disposal facility. |
| Disposal considerations | Dispose of as unused product. Empty containers should be taken to an approved waste handling site for recycling or disposal. Do not re-use empty containers.                                                   |

|                        |                                                                                                                                                                                                                                                             |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Waste treatment Method | If this product becomes a waste, it could meet the criteria of a hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA) 40 CFR 261. Before disposal, it should be determined if the waste meets the criteria of a hazardous waste. |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

## 14. Transport information
